

Example Excerpt from PMID 30509125:

“The underlying molecular mechanisms illustrated that **SND1** regulates the gene transcriptional activation of **SLUG** by increasing chromatin accessibility through the recruitment of the acetyltransferases **GCN5** and **CBP/p300** to the **SLUG** promoter proximal region.”

True Positive SND1 & SLUG Algorithm annotation: <u>Related</u>	True Negative SLUG & cadherin Algorithm annotation: <u>Not related</u>
False Positive SLUG & cadherin Algorithm annotation: <u>Related</u>	False Negative SND1 & SLUG Algorithm annotation: <u>Not related</u>
